

See what you're doing, review your numbers, and make corrections

Welcome to the Calculation Revolution! With the TrackBack calculator, you can see what you're doing and make corrections to your calculations without starting over.

See what you entered

Just use the arrow keys to TrackBack through your numbers and to select the number or function you want to correct. Then replace your selection with the new value, and continue. It's that's simple!

The TrackBack lets you check up to 79 entries, so you can be sure of your numbers!

NOTE: For longer calculations, it is recommended to obtain sub-totals by pressing the "=" key after a set of 5-10 values, then continue on and verify the next set of numbers.

Features

Customer Reviews:

Review 1:

It has everything I need - big numbers and keys, large digital
readout, hybrid power so it doesn't run out of batteries,
not a bunch of complicated functions!

Review 2:

I love this calculator! I am an accountant, and being able to
see and edit the audit line is fantastic.

Review 3:
